

# CLASSIC CET EQUINE SPA

## General Information

Remote filter, blower and tank. Triple filtration system protects the pump and offers optimal performance. No expensive filter cartridges to replace.

New safety features include raised side bars and front security grille for the protection of horse and operator. Externally sealing doors for rapid and safe opening in an emergency. Totally smooth internal sides i.e. no door posts for the horse to snag on.

Designed for static use it can be modified for a mobile service.

Quick release anti-rear strap and choice of horse or spa mounted faecal collection devices.

Infinitely variable air controls and low noise blowers help to keep the horse relaxed.

Fully insulated tank, pipes and spa eliminate unnecessary heat gain and minimise chilling costs.

Simple push button operation.
