

CET Equine Spas

Designed from the Horse Out

CET Equine Spas Premier Model

General Information

Integrated filters, pumps, tank and blower. Triple filtration system protects the pump and offers optimal performance. No expensive filter cartridges to replace.

Raised side bars and neck guard for the protection of both horse and operator. Externally sealing doors for rapid and safe operation. Totally smooth internal sides i.e. no door posts for the horse to snag on.

Light in weight this spa can be used as a mobile unit though ideally it is designed for static use.

Quick release anti-rear strap and horse faecal collection harness.

Infinitely variable air controls and low noise blowers to keep the horse relaxed. Fully insulated tank, pipes and spa minimise heat gain and unnecessary chilling expense.

Simple push button operation.

High speed pumps for rapid fill and emptying of spa.

Technical Specification

Internals: CE or UL Approved Pumps and Chiller

Power: 230v & 110v Options

Construction: Marine Grade Stainless Steel

Size: Approx. 2.5m x 2.3m

Weight: 950 kgs

Colour: Choice of colours

Delivery: 4 to 6 weeks

Cost: On application

CET Equine Spas Deluxe Model

General Information

Integrated filters, pumps, tank and blower. Triple filtration system protects the pump and offers optimal performance. No expensive filter cartridges to replace.

Raised side bars and neck guard for the protection of both horse and operator. Externally sealing doors for rapid and safe operation. Totally smooth internal sides i.e. no door posts for the horse to snag on.

Light in weight this spa can be used as a mobile unit though ideally it is designed for static use.

Quick release anti-rear strap and horse faecal collection harness.

Infinitely variable air controls and low noise blowers to keep the horse relaxed. Fully insulated tank, pipes and spa minimise heat gain and unnecessary chilling expense.

Simple push button operation.

High speed pumps for rapid fill and emptying of spa.

Sectional design to facilitate access e.g. where narrow doorways prevent the Premier model being utilised.
